ASSENTS FOR CHILDREN YOUNGER AND OLDER CHILD VERSIONS

- Assent forms are typically used with children who are 7 to 14 years of age. Therefore, the target language level is a 4th grade reading level. This means that some very young children will need to have the assent read to them. For these reasons, the biggest challenge in writing assent forms is keeping the language and concepts appropriately simple.
- Children 15 years of age and older are generally expected to give assent by signing the consent form used by their parents. However, if an investigator believes an assent form is better for this age group because of the complexity of the study or the nature of the study population, one may be used.
- Although there are very formal requirements for the elements that must be present in a consent form, no such requirements exist for assents. This means that the investigator can propose assent content that he/she believes will best inform the 7 to 14 year old participants about the study. The length of the assent form should be proportional to the complexity of the study and the age of the participants.
- The signature block only needs lines for the child to write his/her name and the person obtaining assent to sign his/her name. The person obtaining assent must be someone who is approved to obtain consent for the protocol.
- If the child is not able to read the assent form, and verbal assent is obtained using the content in the assent form, the person obtaining assent should place in the chart or research record a statement with the following content.

I have discussed this research study with _____ using language which is understandable and appropriate for the participant. I believe that I have fully informed him/her of the nature of the study and its possible risks and benefits. I believe the participant understood this explanation and assent to participate in this study.

Below are two templates that may be used as a basis of developing an age appropriate assent. The first is more suitable for a younger child. The second may be more suitable for an older child. **Include Investigator Letterhead, a version date and page numbering.**

Children's Emergency Consent Form

If your child/children needs emergency medical care and you aren't available to give formal consent to medical authorities, care may be unnecessarily delayed.

To protect your child, leave a completed Emergency Consent Form with your baby-sitter, day care center or temporary guardian.

In the event of a medical emergency, the form should accompany your child to the hospital.

I/We hereby authorize _____
to give

consent for all medical and/or surgical treatment that may be required for our child/children during our

absence from (date) _____ until (date) _____.
